Mei Chen

Supply chain analyst · M.Sc. Logistics
Stuttgart · mei.chen.test@example.com

> I make logistics operations plannable with data: forecasts and reports that two warehouses use every day.

WORK

Mar 2024 – Aug 2026 — **Working Student, Supply Chain Analytics** · Beispiel Logistik GmbH, Stuttgart

- Built a picking-volume forecast that now supports shift planning at both sites
- Built a weekly Power BI KPI report for the site managers
- Analysed storage-location usage and proposed improvements

Oct 2023 – Feb 2024 — **Research Assistant, Chair of Logistics** · Hochschule Beispielstadt, Beispielstadt

- Cleaned and harmonised movement data from three partner warehouses

Sep 2022 – Feb 2023 — **Purchasing Intern** · Muster Trading Co., Chengdu

- Built an Excel scoring model for about 40 suppliers

EDUCATION

Oct 2023 – Sep 2026 — **Master of Science, Logistics and Supply Chain Management** · Beispielstadt University of Applied Sciences · Grade 1,6

Thesis: Hierarchical forecasting of picking volumes in multi-site warehouses

Sep 2018 – Jun 2022 — **Bachelor of Engineering, Industrial Engineering** · Sichuan Example University · Grade 3,5 / 4,0 (GPA)

Thesis: Assigning storage locations by access frequency in a spare-parts warehouse

SKILLS

Data & analytics	Python, SQL, Forecasting, Statistics
Logistics	Route optimisation, Warehouse simulation
Tools	Power BI, Excel

PUBLICATIONS

- Hierarchical picking forecasts for multi-site warehouses, Beispiel Logistics Workshop 2026 May 2026
